

## Environmental Policy

Project Services is committed to promoting responsible and innovative environmental practices with respect to the services and products we provide and our internal operations throughout the State.

In support of this policy, an Environmental Management System, conforming to ISO 14001, has been implemented which is designed to provide a framework for continuous improvement in environmental outcomes.

Project Services will support and encourage clients to incorporate appropriate environmental initiatives into the buildings and facilities created or adapted. We will monitor the environmental performance of our own operations seeking to achieve best practice outcomes wherever practicable.

The system will ensure that the relevant legal requirements are met and the environmental objectives of Project Services and client agencies are achieved and extended.

By committing to the concepts of this policy we will aspire to provide services that meet or exceed the expectations of our clients and stakeholders.
